

"In this diary, you will work to learn how to learn. Do you want to bring out the strategist within you? Answer all the questions when your teacher instructs you to do so. If you reach the end of the questionnaire, you'll earn your Mega-Strategist badge

Step 1: I identify what I have to do.

When you start an activity, it's very important to discover... what they are asking us to do. That's why we need to carefully observe the activity and think about it beforehand. It's important for you to remember any similar activity and that you would have solved it before. Then we will know what to do to try to solve it.

What are they asking me to do?

DISCOVER

REMEMBER

I think of an earlier time when I had to do something similar. I write down what I remember:

Could you use it now to solve this activity?

Continue to step 1 on the next page. You are progressing towards your Mega Strategist badge.

Step 1: Identify what I have to do

What did I do right?

On that occasion I solved a similar activity, how did I do it?

My mega-activities

I am discovering that I did do similar activities in the past, what am I going to call these types of activities in order to recognise them in the future?

Bravo! You've made it through the first step towards earning your Mega Strategist badge.

UNIÓN EUROPEA

y Deporte

Step 2: Will I be able to do it?

Now I am going to ask you to think about the difficulty of the activity you have been asked to do. You are going to learn this: when you have to solve any activity it is important to know what your difficulties are, and thus seek help.

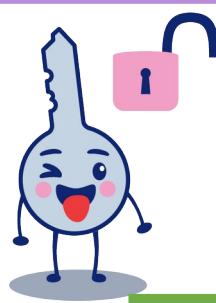

I've just had the activity explained to me... I go back to the Challenge and try to solve it. What is it that I'm finding most difficult to solve?

How can I solve this problem and where do I go for help?

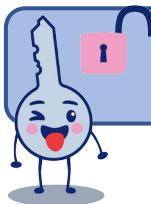

difficulties

Of course it is! It's not all difficulties. You also have many skills. And when you start an activity it is very important to remember them. I invite you to think about them. pienses en ellas.

Skills

What am I best at solving it?

You're on the verge of earning your Mega Strategist badge - just two more steps to go!

Step 3: I review what I learn

Retor has challenged you to solve it with the help of:

- Your skills
- Your classmates
- Your teachers
- And what Retor has taught you.

To be a good strategist it is very important that you are able to think about what you have learned, and what changes you can make to solve the challenge in an excellent way.

Review

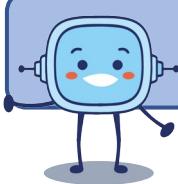

I reflect on everything I have had to do up to this part of the challenge:
(tick what you think you've managed to do)

- I learned to work with my classmates to remember things that we already knew and that we were going to need to solve the challenge.
- I was able to relate the challenge topic to things in my daily life.
- I came up with ideas to solve the initial challenge before I was given information to do so.
- After learning the information we were given, I realised the things I knew before, and the new things I discovered.

Modification

What ideas do I think were wrong before I had more information on the subject?

1. _____
2. _____
3. _____
4. _____
5. _____

Congratulations. You are on the verge of success. You just need the last step and one extra task.

Step 4: What have I learned?

In this last step I am going to ask you to think about what has been the most important thing you have learned. This way you will be able to use it for other challenges in the future. If you have come this far, it is because you are a great strategist.

What is the most important thing I have learned?

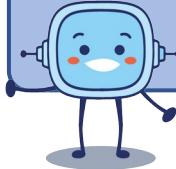

Learning

In what other situations or moments can I use what I have found important? Give examples from your daily life.

Futuro

What did I like most of all the things that were proposed to me?

Motivation

You have successfully completed all four steps. You are now a Mega Strategist. You only have one more small task to complete to earn the badge.

Strategy for learning worked on in the CHALLENGE

In the course of this challenge you have had to put into play a strategy for learning. Clavis has offered to help you learn how to apply it.

A good strategist must know the strategies, but must also think about them in order to be able to use them in future challenges. I propose that you answer these questions that only a Mega Strategist can answer.

What new strategy have I learned in this OER?

I explain in my own words what this learning strategy consists of.

How did it help me to solve the activity I was asked to do?

What did I find most difficult about this strategy?

You've done it. You have earned a new badge that will certify you as a Mega Learning Strategist.
