

COMPETENCIA COMUNICATIVA E COMPETENCIA DIXITAL NA ÁREA DE LINGUA

Lugo, novembro 2011

Principios educativos para a integración das TICs na aula.

Frases para a reflexión

“Quien se atreve a enseñar, nunca debe dejar de aprender.” J. Cotton Dana

"El verdadero progreso es el que pone la tecnología al alcance de todos".
(Henry Ford)

“Para que las TIC desarrollen todo su potencial de transformación (...) deben integrarse en el aula y convertirse en un instrumento cognitivo capaz de mejorar la inteligencia y potenciar la aventura de aprender». (Beltrán Llera)

«El objetivo de la aplicación de las TIC en la educación no es conectar a los estudiantes o darles acceso a las herramientas de la informática. Tampoco brindarles correos electrónicos o páginas webs propias, ni brindarles material educativo en línea. Ni siquiera lograr que usen Internet para realizar sus tareas. El objetivo es potenciar a los actores del proceso educativo y hacerlos más creativos, comunicativos, mejor preparados y más capaces como individuos». (Jacinto Domínguez Andrés, 2007)

“El mero uso de las TIC no implica mejora en la docencia ».
