## Crows

An animal that lives in my area is the crow. Crows live temperate forests, next to trees. They are black. They have a beak. Its body is covered with black feathers. They are omnivores because they eat fruits, cereals and berries. Crows live in groups. Crows are birds because they are born from an egg. Crows are smaller than eagles, but they are darker. Crows are darker than owls. Eagles are hungrier and they eat crows' food. Owls also live longer than crows.

## Grenet

My favourite animal is the genet. Genets live in temperate forests. They are mammals. They are white with black spots, they have a long tail and they have bright eyes. They eat insects, small mammals, lizards and birds. Genets live on their own. Cats are smaller than genets. Genets are bigger and longer than cats. Genets also live longer than cats.

### EXERCISE

Every week I get lots of exercise. From Monday to Friday I walk to the bus stop and back home. At school, we have PE twice a week for an hour on Monday and Friday. We do gym and also play football. At break time I play football in the playground with my friends. After school, I go to swimming lessons once a week on Friday. At the weekend I walk with my brother, my father, my mother and my dog on Sunday. I go to the park to play football with my friends and my brother. When I do exercise, I feel good about myself. I get hungry and I sleep very well.

## Vilar de Barrio y Padre Feijoo, entre los mejores coles 'bloggeros'

El premio nacional Edublogs destaca el proyecto de tres alumnos de un centro rural y la bitácora de ciencia activa de estudiantes de ESO

Dos centros escolares de la provincia se encuentran entre los 32 ganadores de la décima edición del Premio nacional Espiral Edublogs que selecciona los mejores sitios web diseñados e impulsados desde el ámbito escolar. El certamen elige los proyectos más originales e innovadores en diferentes categorías y en el caso de Ourense, los seleccionados son el blog "Ciencia Activa, ESO É", de los alumnos de Secundaria del Colegio Padre Feijoo-Zorelle de la ciudad de As Burgas, y "The Scorpions", del aula de 6º de Primaria del CEIP Plurilingüe Vilar de Barrio.

Estos premios suponen uno de los reconocimientos nacionales más im-

portantes con los que se destaca la innovación educativa en el uso didáctico de los blogs. En el caso de Vilar de Barrio, un colegio rural en el que quinto y sexto curso de Primaria están agrupados en una sola aula de 11 alumnos de los que tres son de sexto; el blog se ha convertido en una herramienta de motivación para el

uso de la lengua extranjera. La profesora de inglés, Isabel Blanco, asegura que la incorporación de la tecnología digital a través del propio blog y Google Apps ha estimulado a los chavales consiguiendo algo que los profesores no habían logrado hasta ahora, que hablen en inglés entre ellos fuera del aula y del horario escolar.

A través del blog "The Scorpions" que los tres alumnos de sexto pusieron en marcha el curso pasado, los chavales publican las tareas y los trabajos de Inglés, Sociales y Plástica, que son las materias que el centro imparte en lengua extranjera, así como vídeos en los que dialogan o recrean situaciones cotidianas. Apostamos por

una metodología más centrada en los alumnos que los prepare para la vida real", indica Isabel Blanco.

Por su parte, "Ciencia Activa, ESO É", es una bitácora en la que los alumnos publican entradas sobre noticias en el ámbito científico, actividades que se hacen en el aula y proyectos que se llevan a cabo en el centro. Además, disponen de un canal de podcasts y de televisión en línea donde publican entrevistas y reportajes, que difunden a través del blog y de las redes sociales. Su profesora, Beatriz Temes, acudirá con una representación de alumnos a la entrega de premios que se celebra el próximo 11 de junio, en Madrid, a donde también viajará la delegación de Vilar de Barrio.
