

# TIPS FOR EDUCATING CHILDREN

*Do it now for your child !!!*

## Give Enough Affection

Children respond to love and care, they do as they see. Make sure you should them love and affection and they will respond with the same.

## Play Together

Children need to play with other children but also with their parents or their guardians. This time spent together playing will allow them to bring out their imaginations even more.

## Give a Praise

Children need positive reinforcement, tell them when they do something well. Giving praise will encourage them to always try their best.

## Listen When Children Talk

Put away your phones, listen to your kids even if they repeat the same thing or hesitate when trying to get it out. Not listening or showing impatience will not help their articulation.
