

ACTIVITY IDEAS / XI GEOGRAPHY / XI.3 European Union countries

Zamawiam licencję

Class 3 / Time: 45 min/ Activity idea: Barbara Ochmańska

Lesson goal: Verify and search information from the official EU website. Groups of 3-4 children. Group work with division of tasks . Other groups guess what country it is.

Students gain knowledge about the flags of European Union countries and the characteristic features of individual countries. During the lesson, flags and representative buildings of a given country are made using KORBO BLOCKS. Thanks to this creative form of learning, children not only learn about the appearance of flags, but also learn about buildings and dishes typical of a country. This practical educational method not only develops manual skills, but also shapes children' cultural and geographical awareness, enabling them to better understand the diversity of the countries that make up the European Union.
