## EXAMEN TIPO TEMA 5. FUNCIONES.

1. Señala cuál de las siguientes gráficas no corresponde a una función:

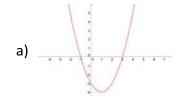

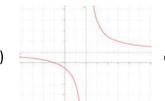

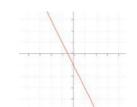

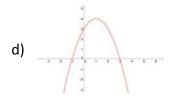

- **2.** La fórmula de la composición  $f \circ g$  de las funciones f(x) = 2x 1 y  $g(x) = -x^2 + 2$  es:
- **3.** La fórmula de la función inversa o recíproca de  $f(x) = \frac{x-1}{x+2}$  es:
- **4.** La gráfica de la función  $f(x) = -x^2 + 2x + 3$  es:

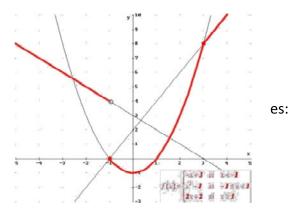

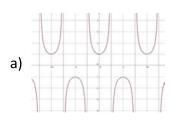

**5.** El dominio de la función  $f(x) = e^{\frac{x}{x^2 - I}}$  es:

**6.** El recorrido de la función

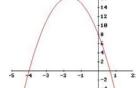

**7.** Los puntos de corte con el eje de abscisas de la función 
$$f(x) = \ln(x^2 - 3x + 3)$$
 son:

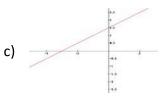

## 8. La única función impar entre las siguientes es:

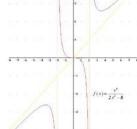

b)

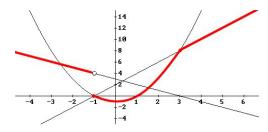

,

d)

9. El intervalo donde la función

es negativa es:
