

Good morning, dear student and family:

I am Laura Losada Vieiro, the person in charge of the EDIXGAL program at our school. I am also a mathematics teacher.

Edixga program

EDIXGAL is an educational program from the Xunta de Galicia that provides a computer to every ESO student, enabling them to access materials, work in class and at home, and so on.

The rules for use are very simple:

- The computer may be left in the classroom overnight, stored in the charging cart (I will explain which cart to use and how to place the computer in it). The cart is opened daily at 9:00 AM and closed at 2:30 PM.
- The computer may be taken home (you must sign the loan agreement attached to this letter). In this case, the student is responsible for always bringing the computer fully charged so they can work.
- The computer is to be used only in the classroom (it may only be taken out of the classroom if the student needs to use it in another class). It may not be taken out of the classroom during recess.
- The computer is to be used only when the teacher permits it.
- Using classroom power outlets to charge the computer is not permitted (it must either arrive charged from home or have been charged in the cart overnight).
- The equipment is for educational use; it must not be misused by accessing websites or platforms unrelated to this purpose.

If you have any questions regarding proper use of the computer, please consult the class tutor or me, the EDIXGAL coordinator.

Equipment breakage insurance

Breakage insurance is available for the computer on a voluntary basis. The cost is €49 for the entire school year, covering the device through August.

While purchasing the insurance is not mandatory, it is highly recommended. For instance, if a key or the screen breaks, the insurance covers the repair at no extra cost to the family—and these repairs can be very expensive.

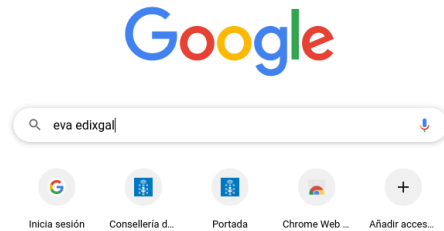

It does not cover theft or loss of the device.

Online work platform

For classwork, we will use the EVA EDIXGAL platform; this is a website where you will find all the materials needed for the assignments your teachers set for you.

To access this platform, follow these steps:

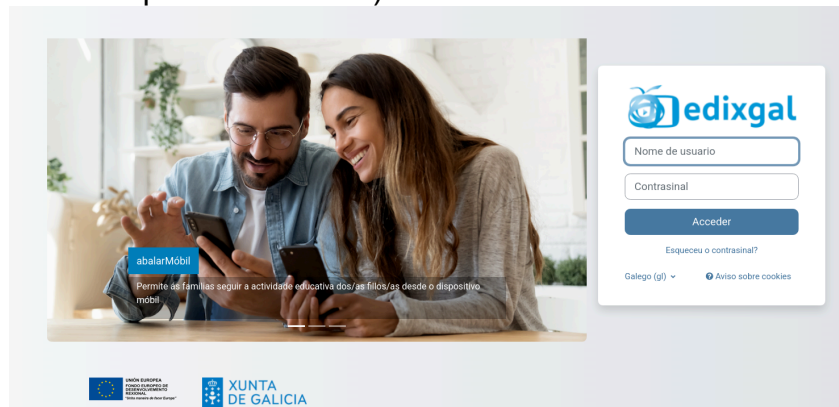

- Step 1: Go to a search engine (e.g., Google).
- Step 2: Type “eva edixgal” into the search box.

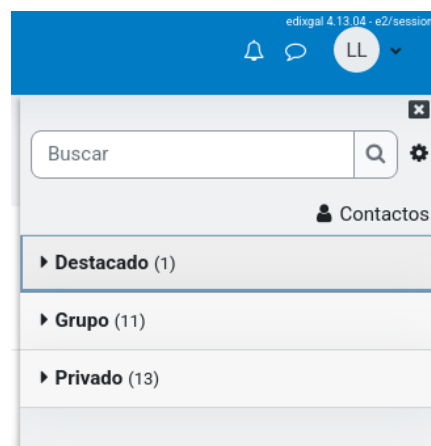

- Step 3: Select the edixgal page

eva.edu.xunta.gal › login
Aula virtual eDixgal - EVA - Xunta de Galicia

- Step 4: Enter your username and password in the fields (I provide your username and password below).

- Step 5: You will see the available materials there. You will also see a messaging area where you can participate in the 3rd-year ESO student group and send individual messages to your teachers to ask questions.

Your credentials:

Your teachers will give you your username and password.

(You must change this password to a new one of your own creation, which must be at least 8 characters long and include uppercase letters, lowercase letters, and numbers.)
