

## SPEAKING: : Patient Assessment & Emergency Equipment

**1.** In pairs, one student will be the **patient** and the other the **EMT**. The patient describes symptoms, and the EMT must **assess the situation and decide what equipment to use**, explaining their actions out loud.

### - PATIENT:

**Describe pain. Name the body parts and describe the pain or problem you see.**

- I have pain in my \_\_\_\_\_.
- It hurts in my \_\_\_\_\_ and \_\_\_\_\_.
- I feel discomfort in my \_\_\_\_\_.
- My \_\_\_\_\_ is sore.

### - EMT:

#### **1. Ask questions.**

- Where does it hurt?
- How intense is the pain (1–10)?
- When did it start?
- Does it hurt when you move?
- Do you have any medical conditions or allergies?
- Are you taking any medication?

#### **2. Decide and Use Equipment**

**Explain what you are using and why.**

- I'm going to use a **bandage** to stop the bleeding.
- I'm applying **gloves** for protection.
- I'll use an **oxygen mask** to help you breathe.
- I'm placing a **cervical collar** to protect your neck.
- I'm using a **splint** to immobilize your \_\_\_\_\_.
- I'll check your vitals with a **blood pressure monitor / pulse oximeter**.
- I'm preparing the **stretcher** for transport.

**Describe pain after walking or standing for a long time.**

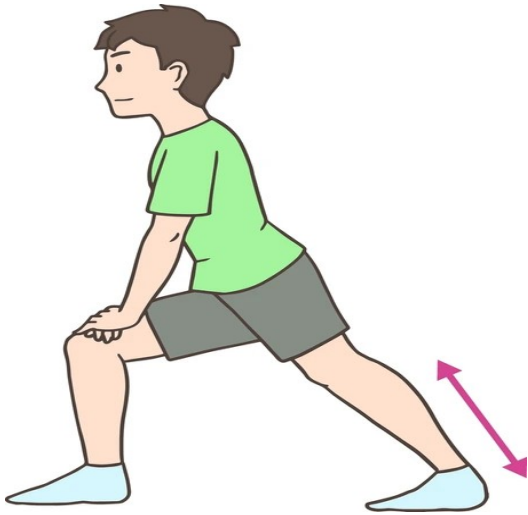

**Describe a headache.**

**Describe pain from repetitive movement.**

**Describe muscle tension or stiffness.**

**Describe pain after sports or standing.**

**Describe pain after running or a small injury.**

**Describe skin irritation or discomfort.**

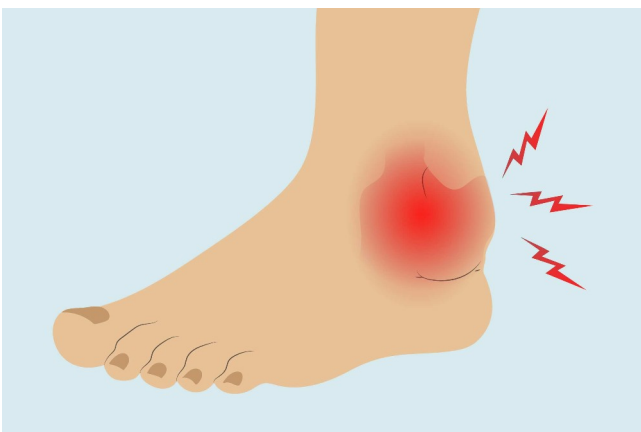

**Describe stomach pain or discomfort.**

**Describe discomfort and when to seek medical help.**

**Describe pain caused by shoes.**

**Describe swelling and pain.**

**Describe irritation or breathing problems.**
