

Completamos con 0 delante hasta tener 8 dígitos

A → 65 0 1 0 0 0 0 0 1
 ↓
 n → 110 0 1 1 0 1 1 1 0
 ↓
 a → 97 0 1 1 0 0 0 0 1

$$1 \cdot 2^0 + 1 \cdot 2^6 = 1 + 64 = 65$$

$$1 \cdot 2^1 + 1 \cdot 2^2 + 1 \cdot 2^3 + 1 \cdot 2^5 + 1 \cdot 2^6 = 2 + 4 + 8 + 32 + 64 = 110$$

$$1 \cdot 2^0 + 1 \cdot 2^5 + 1 \cdot 2^6 = 1 + 32 + 64 = 97$$

65 | 2
 1 32 | 2
 0 16 | 2
 0 8 | 2
 0 4 | 2
 0 2 | 2
 0 1

• Colocar al revés

• Completar con 0 delante hasta 8 dígitos
